### The War on Covid-19

I think it is important that we all wear a mask.

I know you're probably wondering "how long will this last?"

But this is for the safety of every person in the world,

Every little boy and every little girl

We have to look out for the elderly like our grandmothers, grandfathers,

Mothers and our dads

We don't want to hear them coughing, we want to hear them laugh

We don't want them to be suffering that will make us very sad.

So please do everyone a favor and just wear your mask,

It can help stop the virus, and keep germs from spreading.

There's a higher chance of not getting sick,

Or spreading Covid like confetti

But let's be open-minded and take a look at the bright side

People are showing integrity, their hearts are opened wide

Support is being shown everywhere, everybody's being kind

Patience is a virtue, so we're adapting to this new way of life

Creative entrepreneurship is rising, because of new fashion designs

New hobbies are being developed, there's a variety of mask designs

Small, medium, large any size that you can find

People are also expressing their individuality from a mask that's on their face

From their favorite colors, movies, country or their race

But back to the risks that come with not wearing a mask

Let's not contribute to this virus, because nobody wants it to be spread

We shouldn't be selfish, keep in mind there's youth and adults incarcerated

They are facing tough times as well, due to this pandemic

No visits from their brothers, their sisters, or their parents

But they too have to wear a mask, although it's not something they like

They don't want to wear them either, but they're knowing that its right

We're all in this together and I know it's worth the fight.
