2% Individual

1% Community

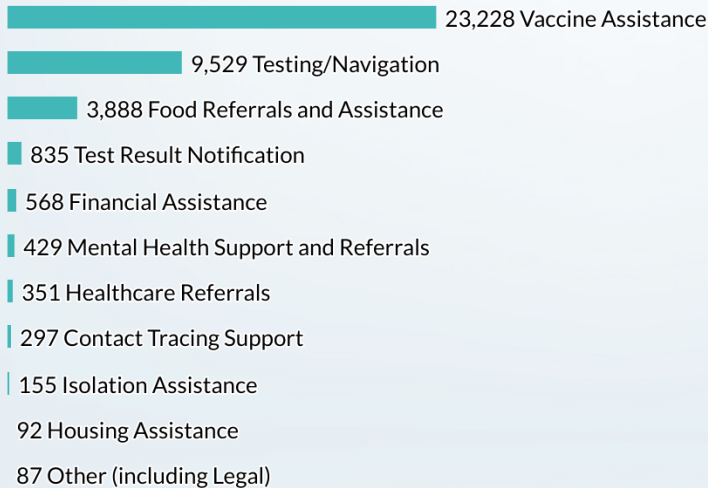

8.3 Million

Estimated number reached through media including newspaper articles, social media, press releases and tv interviews.

Support Services Provided

Client Stories

I have got positive test result after taking the Covid-19 test at the mobile site on Dec. 14. I was scared and worried about my result, but my biggest concern was infecting my grandfather who is currently 90s because I am living with him at the same house. Thanks to API team, I was able to have temporary housing information (illumination foundation) for self-isolation and to receive a care package as well. I am truly grateful for their support and efforts - Juan E

I was so afraid because my co-worker had COVID and I had just seen her. I didn't know what to do and was so worried and couldn't sleep or eat and felt like I couldn't breathe. I found out about the testing site at my church and was able to go there. I got my results back so quickly and found out I was negative. I'm so relieved and thankful there was a testing site in my community to help me and it was in Korean. I told my friends and family about the program and all the help I received from your group (API Task Force).- Helen K
