

SIDE EFFECTS

Facebook/Instagram:

The vaccines are safe and do their job, so don't worry if you experience side effects, if any. Think of them as signs your vaccine worked. Side effects can include fatigue, sore arm, fever, aches or chills. It's okay to have questions. It's alright for it to take whatever it takes for you to be ready. Visit covidvaccinefacts.com for more COVID-19 facts and updates. Let's get you there. Let's #GetToImmunity #OCCOVID19 #ThisIsOurShot
